REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: independent claim 1 and the respective dependent claims are allowed. The instant invention requires a novel, non-obvious double twisted spiral gabion structure for a gabion mesh. The structure requires an upper and lower wire twisted at least a plurality of times in a front spiral form, a straight bisecting transverse wire inserted between upper and lower wires, and subsequently reversing the twist spiral direction to form a rear spiral structure of at least a plurality of rear twists. This structure provides a gabion mesh that is much more dimensionally stable than prior art gabion mesh structures because the upper, lower, and transverse wires show virtually no movement within the structure due to the plurality of twists and even more advantageous the gabion mesh is able to be formed continuously in one operation without the intermittent start and stops needed and additional operators to insert the transverse wire as in prior art forming of structural gabion mesh with only one wire twist direction.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert H. Muromoto, Jr. whose telephone number is 571-272-4991. The examiner can normally be reached on 8-530, M-F.
